

## Wyoming County Schools

### **SchoolMessenger**

---

SchoolMessenger is an automated system that contacts parents through phone calls to notify them about absences, important news, school closings, and crisis situations. Approximately 2,000 phone calls can be placed per minute with SchoolMessenger. School principals and county administrators use this system to ensure parents stay informed about important events in their child's schools.

Please contact your child's school if any of your contact information changes.
