Communities
In Schools

Struggling students and their families have a hard time accessing and navigating the maze of public and private services. There may be ample resources in a community, but rarely is there someone on the ground who is able to connect these resources with the schools and students that need them most. Through a school-based coordinator, CIS brings community resources into schools to empower success for all students by removing barriers for vulnerable students at risk of dropping out, keeping kids in schools and on the path to graduation and leveraging evidence, relationships and local resources to drive results.

One of the most significant benefits of the LiveGrades system is the interface for Students and Parents to access grades, instantly, online. It is the mission of the LiveGrades product to not only simplify grading for teachers, but, also to improve communication between teachers and students/parents. By making grades available online, students/parents are empowered to monitor their progress closely, and utilize this information to focus efforts to improve their performance within class.

Assessment and Learning in Knowledge Spaces is a Web-based, artificially intelligent assessment and learning system. ALEKS uses adaptive questioning to quickly and accurately determine exactly what a student knows and doesn't know in a course. ALEKS then instructs the student on the topics he/she is most ready to learn. As a student works through a course, ALEKS periodically reassesses the student to ensure that topics learned are also retained. ALEKS courses are very

complete in their topic coverage and ALEKS avoids multiple-choice questions. A student who shows a high level of mastery of an ALEKS course will be successful in the actual course he/she is taking.

The vision of Proximity Learning is to leverage technology to provide excellent K-12 classroom instruction by digitally connecting students with high-quality, subject area-certified teachers. The mission is to ensure education equality for all students by providing access to a highly-qualified and highly-effective teacher. Learn more at:

<https://proxlearn.com/>

Proximity Learning will be piloted in some schools during the 2019-2020 school term.

Created by experts, Khan Academy's library of trusted, standards-aligned practice and lessons cover math K-12

through early college, grammar, science, history, AP®, SAT®, and more. It's all free for learners and teachers. Students practice at their own pace, first filling in gaps in their understanding and then accelerating their learning. The Khan Academy is the official practice site for the SAT. Learn more at:

<https://www.khanacademy.org/>

CollegeBoard is a mission-driven not-for-profit organization that connects students to college success. Visit the CollegeBoard website for practice information regarding the SAT (required of all Juniors) and the PSAT (required for all Freshmen and Sophomores). The Khan Academy also provides extensive SAT preparation modules. Learn more at:

i-Ready is an interactive online learning environment designed to assess students and provide individualized instruction based on each one's unique needs.

i-Ready will be piloted in some schools during the 2019-2020 school term.
